

Your plan is much more focused. That's a good direction because it avoids turning ChessOX into a full Discord clone. Here's a refined version.

ChessOX Chat System (Simple & User-Friendly)

1. Global Chat (Default)

Every new user is automatically joined to Global Chat.

Features

Text messages only

Emoji reactions

Reply to messages – this not possible once checked

Search messages

Mention users (@username)

Report messages

Pin announcements (admins only)

Global chat which person admin ?

Auto-delete

All messages are automatically deleted after 48 hours.

System notice at the top:

> "Messages are automatically deleted after 48 hours."

2. Custom Rooms

Any user can create a room. All user ?

Create Room

Room name

Description (optional)

Public or Private

Create

Room Owner Controls

Invite users

Remove users

Delete room

Change room name/description

Assign moderators (optional)

Room Features

Text chat only

Emoji reactions

Reply

Search

Pinned messages

Member list

3. One-to-One Chat (Direct Messages)

Users can message each other privately.

Features

Text only

Emoji reactions

Reply

Search conversation

Block user

Delete conversation (local)

No read receipts or typing indicators initially—they can be added later if needed.

4. Message Features

Available everywhere:

Text

Emoji reactions

Reply

Copy

Delete your own message

Report message

Keep the interface clean by avoiding unnecessary options.

5. Navigation

Chat

└— Global Chat

└— Direct Messages

└— My Rooms

└— Room A

└— Room B

└─ + Create Room

6. Notifications

Notify users only for:

New direct messages

Room mentions (@username)

Invites to rooms

Admin announcements

Do not send notifications for every new message in busy rooms.

7. Moderation

Global Chat

Managed by ChessOX admins.

Messages expire after 48 hours.

Custom Rooms

Managed by the room owner and moderators.

Owners can mute, remove, or ban members.

8. Future Enhancements

After the basic system is stable, you can add:

Chess position (FEN) sharing

PGN sharing

Voice rooms

Polls

Room categories

AI chat moderation

Overall Assessment

This is a solid MVP because it has three clear communication modes:

1. 🌐 Global Chat – everyone participates automatically.
2. 👥 Custom Rooms – communities and clubs.
3. 💬 Direct Messages – private conversations.

Limiting the initial release to text + reactions keeps development simpler, reduces moderation complexity, and provides a fast, familiar user experience.
